

In Class Project #2 Shape

Shapes imagined with Sci-Fi music:

You will listen to sci-fi music and draw shapes that correspond to what the music effects sound like.

There will be 2 different segments of sci-fi music from different films.

You hear the music segments without information regarding the film source of music play - however, now at the end of the project, the source of music will be known for further investigation or redoing the project.

Hands On exercise using sheets from sketchpad required with supplies.

Use any media you prefer from your class supply kit.

You will use 2 sheets from your sketchpad.

Develop line and shape ideas as you listen to the two music pieces.

React - dialog - respond to the two separate music pieces on two separate sheets of drawing paper

Draw shapes that correspond/react/dialog/respond to what the music segment sounds like.

Two different drawings to the two different music segments on two separate drawing sheets.

Draw with reaction to what you hear.

When the music selections have been played.

Study your line and shape ideas.

On a separate (third) sheet, create a new composition that layers and includes design shape compositional aspects from the two previous drawings.

Create your own "sound mix" drawing.

Note: If you would like to compose your final "sound mix" drawing digitally, you have that option. Be sure to construct your image size appropriate for projection - 900 to 1000 px - range.

These are links to the music segments:
