Project 3: Editing Techniques

Create a video (one .mov video file) that shows examples of the following—

1. Static edit
2. Tight edit
3. Loose edit
4. Splitting an event (match cut/cut on action)
5. Create an event by slowing down footage
6. Cut on a natural wipe
7. Create a forced transition by ickering video at the frame level
8. Smooth edit
9. Dynamic edit

Consider to create a simple/short lower-third to label each techniques.
The length of your video can vary between 45 to 90 seconds.

* Avoid any unnecessary shake in your footage. Make your camera stable before shooting.

Preset:
HDV/HDTV 720 25
1280 x 720
Frame Rate 25

Render your composition in a way to achive your .mov file in 100MB or less.

Save the file as:
Project03_LastName_VersionNumber_MMDD.mov

Upload the .mov file to your MyCSUNBox folder before class time on Tuesday Oct 10th.
