

Project 4: Editing in Final Cut Pro

Create a video (one .mov video file) that includes:

- 1. Backtime edit
- 2. Fit to fill
- 3. Open format in FCP without changing the scale
- 4. Subclips

* You will use the provided assets to create project 4.

Consider to create a simple/short lower-third to label each section. The length of your video must stay under 2 minutes.

Sequence preset:

 \Box

Name: Project 4 General Video Processing Timeline Options Render Control Aug	in Output
Width Height Aspect Ratio Frame Size: 1280 x 720 HDTV 720p (1	
Pixel Aspect Ratio: Square 📀	Anamorphic 16:9
Field Dominance: Lower (Even)	
Editing Timebase: 25 📀
