Project 4: Editing in Final Cut Pro

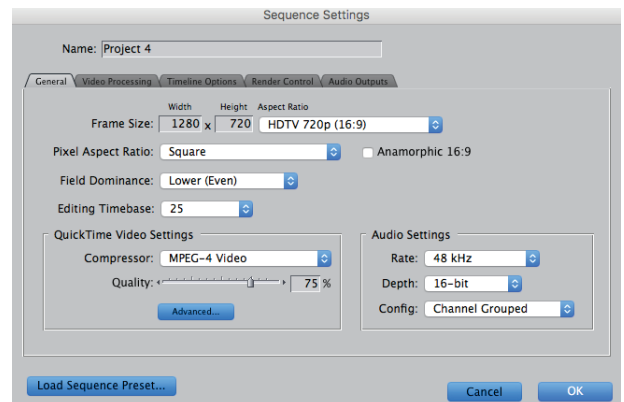

Create a video (one .mov video file) that includes:

1. Backtime edit
2. Fit to fill
3. Open format in FCP without changing the scale
4. Subclips

* You will use the provided assets to create project 4.

Consider to create a simple/short lower-third to label each section.
The length of your video must stay under 2 minutes.

Sequence preset:

Save the file as:

Project04_LastName_VersionNumber_MMDD.mov

Bring your project to class on Tuesday and we will export the file to upload in CSUNBOX.
