## Project 5: Abstract Practice - Color Alteration

Create a video (one .mov video file) by layering AND manipulating the footage color.  
The result must be an unrecognizable video with unified visual theme while:

1. has 12-15 seconds length
2. has at least 3 footages
3. has at least one event

After your abstract section (12-15 second) include your normal shots.

\* While you can use some of the provided footages for project 5, mainly you are expected to use YOUR footage for this project.

Try to record some Interior AND Exterior footage and use them according to your scenario.

Save the file as:

Project05\_Abstract\_LastName\_MMDD.mov

Upload the file to your folder in CSUNBox before Tuesday class on 24th.
